

# Project Milestones

**Instructor:**  
**Teaching Assistant:**

**Dr. Hosam Mekawey**  
**Eng. Karim Elbowety**

**CS-3130: Android App Development**  
**Winter - 2023**

# Milestones (Presentations)

## UI Design

- Build Wireframe for your UI
- Acquire the drawable assets you might need.
- Build the layout files

## Backend

- Build the backend for your app.
- This could include the Firebase integration, database, Retrofit integration, API interfaces and needed classes, services etc.

## Frontend

- Implement the activity and fragments classes etc.

# Wireframe tool: figma

The screenshot shows the Figma Community website interface. At the top, the browser address bar displays <https://www.figma.com/community/category/inspiration/files>. The page header includes a 'Community' tab, a search bar labeled 'Search Community', a 'Publish' button, and a user profile icon. Below the header is a large banner with the word 'Inspiration' and the text 'Dream bigger with these portfolios, presentations, mockups, and more.' The main content area features a grid of design files. On the left, there is a sidebar with filters: 'All', 'Files + templates', 'Plugins', and 'Widgets'. Below the sidebar, there are 'Related tags' including 'portfolio', 'logo', 'mockups', 'redesign', 'typography', 'concept', and 'project'. The main grid displays several design files, each with a thumbnail, title, creator name, and engagement metrics (likes and views). The files shown include 'Design System' by Pingo Agency, 'Free Designer Portfolio...' by Kari Slizova, 'Etar Design System For Figma' by Etar Design Studio, and 'Mobile Device Mockups Library'.
